

## 0.1 bivariate: Sample data for bivariate probit regression

### Description

Sample data for the bivariate probit regression.

### Usage

```
data(bivariate)
```

### Format

A table containing 6 variables ("y1", "y2", "x1", "x2", "x3", and "x4") and 78 observations.

### Source

This is a cleaned and relabelled version of the sanction data set, available in Zelig.
