

2.1 Basic behavior

A 'todo' has two main components: its text (whatever it is that is yet to be done), and a mark, that identifies the point in the document where the todo belongs.

todo that was done. The several arguments for the respective commands handle the user's optional arguments. (They have been converted to regular arguments by the \todo commands themselves, so they are all explicit in \@todotoks.)

\todoitem

```
50 \newcommand\todoitem[2]{%  
51   \item \label{todobl:\thetodo}%  
52   (p. -\pageref{todopage:\thetodo}):  
53   {\todoformat\ifx#1\todotoks\else#1 \fi }#2}%
```

\doneitem For \doneitem, what was the optional argument to \done (not to the

```
98   \fi
99   \@todotru
100  }
```

\@displayful I todo For verbose todos, \@displayful I todo:

```
101
```
